

GECKO ONE

ACCESSORIES ATTACHMENTS

EAR DEFENDERS

Ear defenders can be fitted using a headband, neckband, rail, or mounted to the side.

HELMET RAIL

A helmet rail allows lights, cameras, ear defenders and other accessories to be applied to the helmet.

GRIP PAD

Using a 3M adhesive the grip pad can be applied to the surface of the helmet. The grip can be used to hold flashlights and spherical cameras.

NVG MOUNT

An NVG mount is used to hold night vision goggles and other compatible accessories in place.

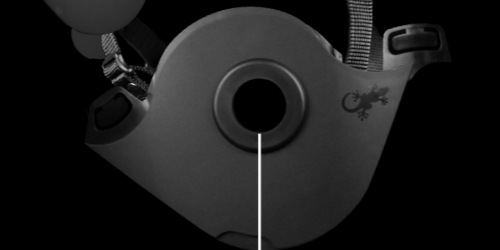

GOGGLE ATTACHMENT

The goggle attachment straps allows goggles to be held securely at the back of the helmet.

VISOR

A long clear visor can be applied to the all configurations. The visor can not be applied alongside the helmet rail.

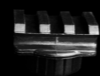

GRIP INSERT

The grip insert can be inserted in to the ear aperture of the ballistic. The grip can be used to hold flashlights and spherical cameras.

PICATINNY RAIL INSERT

The picatinny rail insert can hold flashlights, cameras and other equipment.

GECKO HEADSET

The PTT Gecko headset slots in to the insert aperture.

GO PRO GRIP

The Go Pro Grip can be inserted in to the ear aperture of the ballistic. The grip can be used to hold flashlights and spherical cameras.
