# CUT AWAY

The **Cut Away** is a variation of our popular Open Face helmet, the shape of the Cut Away has been modified to allow for ear defenders to be mounted to, or worn underneath the helmet. The cut away is most popular with maritime pilots or those in high noise environments. Compatible with many Gecko accessories, even our headset which can be fitted with a seacom headband.

## DESIGN

The cut away is made from fibreglass and a aramid reinforced composite to reinforce penetration resistance. The patented inflatable liner is an integral part of the helmet design; through an oral valve the liner has the ability to inflate or deflate to create a perfect fit every time. The strap has been designed to fit around your ear defenders allowing for a snug fit to your head. The strap has also been designed to stop helmet rotation. The helmet is also designed with a high cut neck line to avoid buoyancy aids causing helmet rotation.

## SPECIFICATION

Size: 57cm – 62cm

Weight: 620 grams

Marine Safety Helmet PAS028:2002

Ear Defence EN352-3 with ear defenders
