OPEN FACE

The Open Face is our most popular helmet model; as used by the RNLI, Royal Air Force, Police and MOD this helmet has been designed to provide maximum head protection in an incredibly lightweight helmet that can be comfortably worn all day. Available in three sizes (small, medium and large) and weighing just 670 grams. Customisable with a range of livery and accessory options.

DESIGN

Using computer aided design the ABS construction provides incredible protection and the grooved design gives an excellent strength to weight ratio. The patented inflatable liner is an integral part of the helmet design; through an oral valve the liner has the ability to inflate or deflate to create a perfect fit. The neck is cut high to allow users full motion of their head to look all around them in case of a helicopter rescue. This also allows buoyancy aids to be worn without pushing the helmet from the back and obscuring vision.

SPECIFICATION

Size:
Small - 52cm - 55cm
Medium - 56cm - 63cm
Large - 62cm - 65cm

Weight: 670grms

Marine Safety Helmet PAS028:2002

Mountaineering Helmet Standard EN 12492
