

Equipment Grips

Gecko grips are designed to hold a wide variety of accessories to your Gecko helmet. They work best when paired with cylindrical shaped objects such as cameras and flashlights with a diameter of 10 – 30 mm.

There are two attachment options; the insert that fits into the ear insert on most Gecko helmets – or the grip pad which sticks to any approximately flat surface on any Gecko helmet by way of a durable sticky pad.

Grip Insert

- Easy push fix attachment
- Two can be used at any one time
- Compatible with the open face, full face & surf helmets
- Designed to release under pressure to prevent injury
- We recommend attaching a lanyard to valuable equipment being held in a grip

Grip Pad

- Compatible with all Gecko helmets
- Easy stick on, hard wearing attachment
- Many grips can be used at any one time
- Designed to release under pressure to prevent injury
- We recommend attaching a lanyard to valuable equipment being held in a grip
